DETAILED ACTION

1. Claim 1 remains for examination. The correspondence filed 4/4/05 did not add, amend, or cancel any claims.

Response to Arguments

2. Applicant's arguments, see the correspondence filed 4/4/05, with respect to the rejection of claim 1 have been fully considered and are persuasive. The rejection of claim 1 under 35 USC 103 has been withdrawn.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 09/844790. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending application's disclosure

Page 2

Art Unit: 2135

supports all the limitations of claim 1 of the instant Application. Claim 1 of Application 09/844790 recites verbatim all the limitations of claim 1 of the instant Application with the exception of "configuring a second server to request a cross-certification for a second interval so that the first server is effectively requested to provide independent proof of the existence of the interval and its public key at a point in time witnessed by the first server." However, the disclosure of 09/844790 suggests that this limitation could be added (page 6, lines 12-19 and Figure 13). It would have been obvious to one of ordinary skill in the art at the time the invention was made to add this limitation, as it would render attacks against a single server fruitless (Ibid).

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - U.S. Patent 4,309,569 issued to Merkle, Ralph C.
 - U.S. Patent 5.022.080 issued to Durst et al.
 - U.S. Patents 5,136,643, 5,373,561, and 5,781,629 issued to Haber et al.
 - U.S. Patents 5,136,646 and 5,422,953 issued to Fischer, Addison M.
 - H. Massias and J. Quisquater. Time and cryptography, 1997. Université catholique de Louvain, March 1997. TIMESEC Technical Report WP1.
